

Make a drawing of the ROOM where the under floor heating is required. Please make accurate measurements in metric, not feet and inches. We suggest you make each square 50 cms., so 2 square lengths = 1 meter. The grid below is therefore 7 x 8 meters.. Should you need larger, reduce the scale to 1 meter / box or send a separate drawing on reverse. Please write measurements along the sides of the 'walls'. Please plot and annotate fixed items as kitchen units, fixed floor, standing cabinets, showers, water closets, wardrobes etc. where the heating mat will not be placed. Please also indicate where doors are located and also 13 amp sockets are available.

PLEASE USE A SEPARATE DRAWING FOR EACH ROOM YOU REQUIRE

YEAR BUILT?      HOUSE ? FLAT? BRICKWOOD?      OTHER  
 HOW MANY EXTERNAL WALLS TO ROOM .....

ARE THE EXTERNAL WALLS INSULATED - YES / NO

IS THIS ROOM ON - GROUND FLOOR /UPSTAIRS FLOOR (PLEASE DELETE)
